```
Question 1
Correct
Mark 1.00 out of 1.00
```

Given an array of N integer, we have to maximize the sum of arr[i] \* i, where i is the index of the element (i = 0, 1, 2, ..., N). Write an algorithm based on Greedy technique with a Complexity O(nlogn).

Input Format:

First line specifies the number of elements-n

The next n lines contain the array elements.

**Output Format:** 

Maximum Array Sum to be printed.

Sample Input:

5

25340

Sample output:

40

Answer: (penalty regime: 0 %)
